To Whom It May Concern,

I saw your job posting for a Feel Engineer and it caught my interest. I would love the chance to discuss this opportunity with you. My personal projects have consistently been inspired by games developed by ThatGameCompany.

I am currently a UI Programmer at Red 5 Studios, where I have had the opportunity to support a Chinese Localized Launch and European / North American major update. Prior to working Red 5, I contributed to the game Kaneva in Atlanta, GA after graduating from the Computer Science program at Georgia Southern University, where I earned a 3.85 GPA and acted as Vice President of the Aurora Game Development Club where I developed over 15 games and taught game development techniques.

ThatGameCompany tops my list of target employers as it is known as a pinnacle for design and fun. I'd love the opportunity to create games with your team. Thank you so much for your time and consideration.

Sincerely,

Ashleigh Amrine
